

Uber Freight

Global real-time tracking from sea to sky

Gain seamless Ocean and Air shipment
visibility and control on Uber Freight TMS

Visibility isn't just about peace of mind

In an era of increased supply chain volatility, visibility and proactive exception management are vital to maintain customer relationships and minimize detention and demurrage. Shippers with vast container networks need to know where their shipments are at all times to avoid increased costs, service disruptions, and fines.

Unlock unprecedented transparency

With Ocean and Air Visibility on Uber Freight TMS, logistics teams can quickly and easily connect and visualize complex, multimodal shipments in a simple, intuitive, interactive user interface. Instead of jumping between tools, they can pull all tracking, documentation, and communication across all modes into a single pane of glass to gain a bird's-eye view of shipments to quickly understand which containers need attention.

Expanding horizons in Ocean and Air visibility

Accurate and timely visibility helps shippers stay ahead of potential disruptions and avoid unexpected costs. That's why Uber Freight TMS helps you:

- **Monitor shipments in real-time** with updates every fifteen minutes to proactively address route deviations.
- **Access a 360-degree view of shipments** by integrating real-time data from over 130 sources with your internal systems.
- **Visualize multimodal shipments** on an interactive map and leverage an intuitive interface that consolidates tracking, documentation, and communication.
- **Pre-integrated with 40+ major ocean carriers and 80+ ports**, covering 99% of the global market so you can get started quickly.
