

Uber Freight

Power up with Powerloop

Where reliability and control
meets flexibility and scalability

A smarter way to scale

As your business grows, so do the complexities that come with managing your logistics end-to-end. You need to stay focused on what's going to move the needle for growth while keeping operating costs low.

If you're searching for ways to expand your drop capacity without the operational hassle, then you need Powerloop. The Uber Freight capacity solution combines the reliability and control of the Powerloop trailer fleet with the flexibility and scalability of one of the largest shipper-carrier ecosystems.

Not your average trailer pool

With Powerloop, you gain access to over 1,000 state-of-the-art, well-maintained smart trailers with an average age of 3.5 years, on your terms. Trailers are proactively deployed nationwide across Uber Freight's network, monitored 24/7, and maintained a dedicated Uber Freight team so you can:

- **Unlock more coverage** for your drop and live needs from carriers hauling power-only loads on Uber Freight's extensive network of over 95,000 carriers.
- **Customize your capacity mix** with access to a variety of freight formats—including contract and dedicated capacity—built to help you navigate all market conditions
- **Gain unparalleled trailer visibility** with smart trailers equipped with GPS, cargo sensors for loaded and empty status, door sensors for open or closed status, built-in triggers for fraud monitoring and alerts, plus interior-facing cameras monitoring location and capacity 24/7.
- **Get automated and custom status reports** detailing shipment status, trailer location, and carrier performance. Data generated from Powerloop smart trailers can also be sent directly to your TMS for seamless tracing, tracking, and proactive risk mitigation.
- **Expand your fleet more efficiently** with Powerloop trailers, especially if you're transitioning to EV and AVs.
